Interfaces

IBorrowable

+IsCheckedOut : bool {readOnly}
+BorrowerId : string? {readOnly}

+CheckOut(borrowerId : string) : void
+CheckIn() : void

INetworkable

+IpAddress : string? {readOnly}
+MacAddress : string? {readOnly}

+AssignNetwork(ipAddress : string, macAddress : string) : void

Services

AssetsServices

-_assets : Dictionary<string, CampusAsset>

+GetAll() : IReadOnlyCollection<CampusAsset>
+GetByTag(tag : string) : CampusAsset
+Add(asset : CampusAsset) : void
+Remove(tag : string) : bool
+SearchByName(keyword : string) : List<CampusAsset>
+FilterByStatus(status : AssetStatus) : List<CampusAsset>
+FilterByType<T>() : List<CampusAsset>
+GetCheckedOutBorrowables() : List<IBorrowable>
+GetNetworkDevices() : List<INetworkable>
+GetTotalDepreciation() : decimal
+GetStatusSummary() : Dictionary<string, int>

Models

CampusAsset

-_assetTag : string
-_name : string
-_purchasePrice : decimal
-_status : AssetStatus
#AssetTag : string {readOnly}
+Name : string
#PurchasePrice : decimal {readOnly}
#PurchaseDate : DateTime {read Only}
#Status : AssetStatus {readOnly}

#CampusAsset(assetTag : string, name : string, purchasePrice : decimal, purchaseDate : DateTIme)
+CalculateDepreciation() : decimal
+GetMaintenanceStatus() : string
+SendToRepair() : void
+ReturnFromRepair() : void
+Retire() : void
+ToString() : string

SoftwareLicense

+SubscriptionMonths : int
+SubscriptionEndDate : DateTime

+SoftwareLicense(assetTag : string, name : string, price : decimal, purchaseDate : DateTime, subscriptionMonths : int, subscriptionEndDate : DateTime)
+CalculateDepreciation() : decimal
+GetMaintenanceStatus() : string

NetworkingHardware

+IpAddress : string? {readOnly}
+MacAddress : string? {readOnly}

+NetworkingHardware(assetTag : string, name : string, price : decimal, purchaseDate : DateTime)
+CalculateDepreciation() : decimal
+GetMaintenanceStatus() : string
+AssignNetwork(ipAddress : string, macAddress : string) : void

Peripheral

+IsCheckedOut : bool {readOnly}
+BorrowerId : string? {readOnly}

+Peripheral(assetTag : string, name : string, price : decimal, purchaseDate : DateTime)
+CalculateDepreciation() : decimal
+GetMaintenanceStatus() : string
+CheckOut(borrowerId : string) : void
+CheckIn() : void

Workstation

+CpuSepc: string
+IsCheckedOut: bool {readOnly}
+BorrowerId : string? {readOnly}
+IpAddress : string? {readOnly}
+MacAddress : string? {readOnly

+Workstation(assetTag : string, name : string, price : decimal, purchaseDate : DateTime, cpuSpec : string)
+CalculateDepreciation() : decimal
+GetMaintenanceStatus() : string
+CheckOut(borrowerId : string) : void
+CheckIn() : void
+AssignNetwork(ipAddress : string, macAddress : string) : void
